

EasiWriter Pro+

Installation guide

CD version

Installation from new

Don't try to run EasiWriter from the CD.

- Insert the CD and drag the EASIWRITER folder on to your hard disc.

When you first run EasiWriter you will be asked to enter your name.

Documentation, in EasiWriter format, is in the GUIDE folder.

- EWGuide is the complete documentation.
- Tutorial is Chapter one.
- Using is Chapter two.
- Reference is Chapter three.

- Drag at least the Tutorial on to your hard disc.

Installation - upgrade

- Make sure you have made a copy of your existing version.
- Click *Menu* over the old version and choose App 'EasiWriter' -> Access -> Unprotected.
- Drag the new copy over the old one on the hard disc.

Internet mailing list

Those of you that have Internet access may want to join the Icon users mailing list. It is a forum where you can discuss the software and receive advice from other users and Icon support personal including the chief programmer.

To subscribe visit our Web site:

<http://www.IconTechnology.net>

and look under Support. While you are there you may also want to look under 'Goodies' for some useful utilities.

Registration

EasiWriter is constantly being developed and we like to keep our users advised of developments. To do this we need to know who you are and where to contact you so please take a moment to fill out the enclosed registration form and post it back to us or email if you prefer. We welcome suggestions for improvements from our users.

Did you know?

Your copy of EasiWriter can spell check in several languages simultaneously:

- Danish
- Dutch
- French
- German
- Italian
- Norwegian
- Spanish
- Swedish
- Swiss German

All you need is an optional dictionary for each language available for £25.00 inclusive. Price includes Site Licence where applicable. *Special offer* - School pack comprising **German, French and Spanish** dictionaries for £50.00 inclusive.

TechWriter

Regarded by many as the best word processor on any platform, double award winner, TechWriter is the product of choice for anyone who needs to incorporate equations in their documents. It has all the features of EasiWriter* plus a powerful, easy to use, equation editor that lets you type equations directly into the text. Is used by the Mathematical Association to prepare their Journal.

Equations can be incorporated in a line of text like this $ax^2 - bx - c = 0$ or displayed on a line by themselves like this:

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

TechWriter also includes equations when writing HTML automatically converting them to GIFs.

Full details can be found on our web site <http://www.IconTechnology.net> or send for a brochure.
